AI Capabilities

Computer Vision	Natural Language Processing (NLP)	Time Series Forecasting	Large Language Models	Speech Recognition & Synthesis
• Image Recognition • Facial Recognition • Object Detection	• Sentiment Analysis • Chatbots • Named Entity Recognition	• Financial Market Prediction • Weather Forecasting • Demand Forecasting	• Text Generation • Machine Translation • Question Answering	• Voice Assistants • Automated Transcription • Virtual Assistants

Our Contributions

Fraud Detection

Data Integration

Deep Learning Model

Real-Time Analytics

Personalized Healthcare

- Detection of Anomalies
- Analysis of Customer Behavior
- Verification of Identity

- Data Mapping
- Data Cleaning
- Data Matching

- Data Driven Improvement
- Feedbacks & Suggestions
- Facial & Gesture Recognition

- Monitoring Systems
- Event-driven Insights
- Financial Trading

- Diagnostics
- Treatment Planning
- Remote Health Monitoring

How We Collaborate

CROSS POLLINATION

- Onshore-Offshore engagement model
- Efficient utilization of staff round the clock
- Flexible for travel to customer location on need basis
- Promotes idea-sharing and best practices between teams to drive innovation

CONNECTIVITY (VPN)

- SSL/VPN communication/ connection
- Provides secure remote access to company resources via VPN
- Enables seamless team connectivity across geographies.
- Strong procedures, process tools, and guidelines

COMMUNICATION

- Emails
- Daily calls
- Messengers (Skype/Slack)
- Video conferencing tools (Zoom, Team, Skype, WebEx)
- Weekly, Monthly and Quarterly Reviews
- Collaboration & Planning tools

OVERLAP HOURS

- Ensure sufficient overlap with clients working hours
- Absolutely flexible, transparent and ethical on the commitments
- Enables direct client communication, improving service quality.

Engagement Models

STAFF-AUG

- Captive team of variable size, working and reporting directly to the client
- Right skilled, handpicked engineers provided to meet the staffing spikes
- Leaders closely monitor daily tasks to maintain quality and meet client expectations
- Easily scale teams to meet short-term or long-term project needs

BUCKET HOUR

- Unique engagement model allows clients to purchase hours in blocks.
- Each block has a minimum validity of three months.
- Clients can select up to six technologies and roles for these hours.
- Engineers deliver tasks within the agreed hours and duration.
- Scope is managed under our leadership.

MANAGED SERVICES

- End-to-end ownership
- Well defined roles responsibilities along with SLAs
- Proactive strategies with effective and efficient resource utilization

FIXED COST

- We encourage for a Discovery phase to clearly define the requirements
- Fixed time, budget, with clearly defined deliverables
- Changes to scope are estimated for separately
